Weekly Update: 04

Reporting Period: 07.07.2025 –14.07.2025

1. Introduction

To offer a more personalized and user-friendly experience, this week's development focused on features that allow users to manage their accounts, view past activity, and upgraded ui.

2. Work Completed

A. User Profile

A dedicated profile page was created where users can view their basic information, such as name, email, and account details. This helps in personal account management.

B. Password Change

A secure password change option was added. Users can update their password by entering their current and new password.

C. Cart History

Users can now see their previous bookings or cart activity. Each entry includes product details and booking time, allowing users to track their order history. They can also see their buying history. They can see the result using some filters.

D. Cart

Other functionality of cart is still under development. We are currently working on the PHP and JavaScript portions. Completion is expected soon.

E. Video Update

A video has been added to the homepage that currently showcases featured products visually. This feature enhances the landing experience and grabs user attention.

F. CSS Styling Update

CSS was improved across all new and existing pages to ensure consistency in layout, colors, font styles, and responsiveness for desktop views.

4. Conclusion

This week, we improved the system's personalization and visual quality. Users can now view their profiles, change passwords, and check their cart history. We also made the site more engaging with video content and updated the styling for better user experience.
